## » Innovations and Bestsellers

### » Double Needle > page 8

- › Reliable signal detection of motoric cranial nerves
- › Quick and precise application due to the placement of two needles at the same time thanks to one common handpiece
- › Pre-defined needle distance
- › Twisted cables

### » Mapping Suction Probe > page 31

- › Subcortical mapping with synchronous suction
- › Simplified maximal tumor removal
- › No change of instruments during procedure

### » LED flash goggles > page 55

- › New small LED Pads enable easy fixation
- › Flexible positioning of LED Pads over the closed eye – fixation only with standard tape
- › Small LED Pads also suitable for children
- › Thin cables for flexible handling in difficult OR situations
- › Standard touchproof connectors for various systems

### » delta-Electrode > page 20

- › Special electrical and mechanical design enables stable and reliable continuous vagus monitoring
- › Easy positioning and secure removal from the vagus nerve thanks to an optimized shape and elasticity of the electrode body

### » ALM Tube > page 18

- › Ultimate reliability in RLN monitoring
- › Multifunctional combination of a clear PVC ET tube and a surface electrode
- › Ultimate signal stability resulting from 360° sensor surface coverage with 8 long electrode contacts
- › Reliable signal recording independent from tube rotation

### » pIOM Set > page 48

- › All accessories in one set – also available for non-invasive recording
- › Intuitive short instruction in package for easy handling
- › Pioneer in pelvic monitoring - more than twelve years of research: improved patient safety and quality of life thanks to neuromonitoring of autonomic nerves!

# 1 | Disposable Electrodes

<https://shop.inomed.com>

Subdermal Needle Electrodes (SDN electrodes) allow an easy and reliable recording of EMG signals.

For different applications inomed Medizintechnik GmbH offers a variety of electrodes in different shapes and lengths.

The SDN electrodes have a 1.5 mm touchproof connector. The electrodes are sterilized with ETO and for single use only.

**Grid/ Strip Electrodes are available in various models with 4, 6 or 8 contacts per strip**

<https://shop.inomed.com>

## 1.2 Grid/Strip Electrodes

### 1.2.1 Electrodes

**Cortex Strip Electrode**

For cortical recording and stimulation,  
with connection cable,  
1.5 mm Touchproof connectors,  
cable length 1800 mm,  
contact material stainless steel,  
contact diameter 4.0 mm,  
contact distance 10 mm,  
single use  
EO-sterilized

**Grid/Strip Electrodes**

Up to 30 days implantable  
Contact: Platinum / Iridium  
MRI-compatible  
Diameter = 2.5 mm, interval = 10 mm  
Contact strip: 0.7 mm thin,  
10 mm wide  
Single use only, ETO-sterilized

### 1.2.2 Electrode Cables

**Grid Electrode Cable**

For the connection of the grid electrodes  
to the different  
systems a respective adaptor cable is  
necessary.

# 3 | Stimulation Probes

<https://shop.inomed.com>

Stimulation probes are hand-held electrodes for intraoperative use. The probes are used for selective stimulation of nerves and neuronal structures and in some cases for the recording of electrophysiological signals.

## BIPOLAR STIMULATION PROBES

Bipolar probes are available in the following forms: bipolar concentric probes, fork and hook probes. In order to accommodate the various application requirements from direct cortical stimulation to stimulation and recording of direct nerve action potentials (NAPs) there are bipolar probes in different shapes. Bipolar probes focus the stimulation current on the area close to the probe tip and can be delivered in a variety of geometries. The concentric probe has a blunt tip and enables a selective and atraumatic nerve stimulation. The BCS probes (BCS = bipolar concentric stimulation) can be used for stimulation of peripheral and cranial nerves and at the brain stem.

## MONOPOLAR STIMULATION PROBES AND SURGICAL INSTRUMENTS

Monopolar probes are used for a sensitive stimulation. The stimulation current flows homogenous through the tissue. They are used for nerve localisation and to outline the nerve pathway.

Monopolar probes have an active electrode (the probe) and a return electrode, which is placed outside the stimulation region. The return electrode can be in the form of a needle electrode or stick-on pad electrodes.

Monopolar stimulation probes are primarily used for motor mapping and peripheral nerve stimulation in spinal surgery and pedicle screw stimulation.

## 3 | Disposable Stimulation Probes

Disposable stimulation probes are sterilized with ETO and for single use only.

All probes have a cable with 3 m length and 1.5 mm touchproof connector.

3.3

Mapping Suction Probe by Raabe

## NEW: Mapping Suction Probe by Raabe

An all-in-one disposable surgical suction tube and stimulation probe

### » Subcortical mapping with synchronous suction

The combination of a surgical suction tube and a stimulation probe allows suction during tumor resection and also enables the **simultaneous continuous dynamic mapping of the corticospinal tract**.

### » Simplified maximal tumor resection

Complicated instrument change from suction to stimulation is not necessary. Use of the Mapping Suction Probe makes it possible to achieve **maximal tumor removal** minimizing the possibility of damage to the corticospinal tract.

### » No change of instruments during the procedure

The package includes the single-use Mapping Suction Probe, a reference electrode and a connection cable to the electrical stimulator. The Mapping Suction Probe can be **connected to commonly used suction devices**.

The use and settings for the inomed Mapping Suction Probe are the same as the setting used for a standard monopolar stimulation probe. There is no difference in settings but all the advantages of combined suction and stimulation from a single device.

#### Mapping Suction Probe by Raabe

**520 300**

# 6 | Overview of Boxes and Cables for Stimulation and Recording

All stimulation and recording boxes are surface disinfectable and are delivered non-sterile.

## 6.1

### Stimulation boxes

**SEP-Stimulation Adaptor 1-4 Ch.**

4 channels high current stimulation and 1 channel direct nerve stimulation, delivered non-sterile, non-autoclavable  
**Unit 1**

**540 501** 5.0 m

**MEP-Stimulation Adaptor 5-12 Ch.**

8 channels high current stimulation, delivered non-sterile, non-autoclavable  
**Unit 1**

**540 511** 5.0 m

## 6.2

### Recording boxes

**EP-Adaptor**

for maximal 8 channel recording to a common reference and the possibility to connect AEP Earphones (540340), delivered non-sterile, non-autoclavable  
**Unit 1**

**540 520** 5.0 m

**EP-Adaptor**

for maximal 8 channel recording to a common reference, delivered non-sterile, non-autoclavable  
**Unit 1**

**540 521** 5.0 m

**EMG/MEP-Adaptor**

for maximal 8 channel differential recording, delivered non-sterile, non-autoclavable  
**Unit 1**

**540 530** 5.0 m

**EMG-Electrode mini box**

4 channels with Ground, 8 x 1.5 mm touchproof connector, delivered non-sterile, non-autoclavable  
**Unit 1**

**540 425** 4.0 m

## 6 | Overview of Boxes and Cables for Stimulation and Recording

### » Stimulation Matrix

The Grid/TES Stimulation Matrix enables flexible change of the stimulation sites during procedure.

Several switches for the interconnection of all stimulation sites for MEP and up to 16 electrodes for grid stimulation in one box makes it possible to use only one stimulation channel.

Easy switching between phase reversal and cortical stimulation over the same grid electrode (same blue recording adaptor) without difficult setup changes during procedure.

## 6.3

### Switch boxes

**Grid/TES Stimulation Matrix 8 Ch.**

for interconnection of up to 8 electrode contacts  
for cortical stimulation and up to 6 electrodes  
for transcranial electrical stimulation

only in combination with MEP Stimulation adaptor 540 510,  
delivered non-sterile,  
non-autoclavable

Art.-No.	Channels
<b>540 549</b>	8

**Grid/TES Stimulation Matrix 16 Ch.**

for interconnection of up to 16 electrode contacts  
for cortical stimulation and up to 6 electrodes  
for transcranial electrical stimulation

only in combination with MEP Stimulation adaptor 540 510,  
delivered non-sterile,  
non-autoclavable

Art.-No.	Channels
<b>540 550</b>	16

**MEP-Stimulationsadapter**

for Grid/TES Stimulation matrix 8 channels high current stimulation,  
only in combination with 540550 or  
540549, delivered non-sterile,  
non autoclavable

Art.-No.	
<b>540 510</b>	5.0 m

## 6 | Overview of Boxes and Cables for Stimulation and Recording

6.4

### Reusable Stimulation Cables

**Stimulation cable**

with 4 pole device connector,  
delivered non-sterile, autoclavable  
**Unit 1**

**520 024** 4.0 m

**Stimulation cable**

with 2 x 1.5 mm touchproof connector,  
delivered non-sterile, autoclavable  
**Unit 1**

**520 027** 4.0 m

**Adaptor cable**

for disposable stimulation probes  
with 4 pole device connector and  
1.5 mm touchproof connector red/black,  
delivered non-sterile, autoclavable  
**Unit 1**

**520 040** 2.0 m

**Stimulation adaptor cable**

for adaptation to monopolar stimulation  
probes or instruments to stimulation  
cable 520 024 or 520 027,  
with 20 mm Needle white and 1.5 mm  
touchproof connector,  
delivered non-sterile, autoclavable  
**Unit 1**

**520 070** 0.7 m

**Stimulation adaptor cable**

for adaptation to monopolar stimulation  
probes or instruments to stimulation cable  
520 024 or 520 027,  
with 1.5 mm touchproof connector black  
and 1.5 mm connector green for reference  
electrode 533 625,  
delivered non-sterile, autoclavable  
**Unit 1**

**520 077** 0.7 m

## 6.5

### Reusable Recording Cables

The cables are either autoclavable or surface disinfectable and are delivered non-sterile.

**Grid electrode cable 16/90**

for max. 2 strips up to 8 contacts,  
fixation at the connection with electrode  
holder 610 099, for connection to  
adaptor or extension cable,  
delivered non-sterile, autoclavable

**Unit 1**

Art.-  
No.

**610 110** 0.9 m

**610 115** 3.0 m

**Grid extension cable**

for max. 2 x 4 channels with  
Redel connector,  
delivered non-sterile, autoclavable

**Unit 1**

Art.-  
No.

**540 304** 2.0 m

**Grid extension cable**

for max. 1 x 8 channels with Redel,  
delivered non-sterile, autoclavable

**Unit 1**

Art.-  
No.

**540 308** 2.0 m

**Grid extension cable**

for max. 2 x 8 channels with Redel,  
delivered non-sterile, autoclavable

**Unit 1**

Art.-  
No.

**540 316** 2.0 m

**Adaptor cable 1 x 4**

for max. 1 x 4 channels with 1.5 mm  
touchproof connector,  
Delivered non-sterile, autoclavable

**Unit 1**

Art.-  
No.

**610 131** 2.0 m

**Adaptor cable 1 x 6**

for max. 1 x 6 channels with 1.5 mm  
touchproof connector,  
delivered non-sterile, autoclavable

**Unit 1**

Art.-  
No.

**610 132** 2.0 m

## 6 | Overview of Boxes and Cables for Stimulation and Recording

**Adaptor cable 1 x 8**

for max. 1 x 8 channels with 1.5 mm touchproof connector, delivered non-sterile, autoclavable **Unit 1**

Art.-No.  **610 133** 0.3 m

**Adaptor cable 2 x 4**

for max. 2 x 4 channels with 1.5 mm touchproof connector, delivered non-sterile, autoclavable **Unit 1**

Art.-No.  **610 135** 0.3 m

**Adaptor cable 2 x 6**

for max. 2 x 6 channels with 1.5 mm touchproof connector, delivered non-sterile, autoclavable **Unit 1**

Art.-No.  **610 136** 0.3 m

**Adaptor cable 2 x 8**

for max. 2 x 8 channels with 1.5 mm touch-proof connector, delivered non-sterile, autoclavable **Unit 1**

Art.-No.  **610 137** 0.3 m

**ISIS Headbox recording cable**

10 pole with push-button adaptors black for adhesive surface electrode, delivered non-sterile, autoclavable **Unit 1**

Art.-No.  **540 402** 2.0 m

## 7 | Other Accessories

<https://shop.inomed.com>

### 7.1 VEP-Stimulation

## LED flash goggles

- » New small LED Pads enable easy fixation without disturbing elastic bands
- » Flexible positioning of LED Pads over the closed eye – fixation with standard tape
- » Small LED Pads also suitable for children
- » Thin cables for flexible handling in difficult OR situations
- » Standard touchproof connectors for various systems

LED flash goggles for VEP stimulation

Ø 18.6 mm,  
delivered non-sterile, disinfectable  
**Unit 1**

Art.-  
No.

**505 055** 3.0 m

# 7 | Other Accessories

## 7.2 AEP-Stimulation

### AEP Insert Earphones

ABR 10 OHM with silicon tubes red/blue and range of earplugs, connector red and blue for insert earphones and Redel connector black/yellow for Headbox

Art.-  
No.

Unit

**540 340** 2m

1

**540 343** 3.8m

1

### Foam ear tips

single use only, delivered non sterile

Art.-  
No.

Unit

**540 345** standard 50

**540 346** small 50

**540 347** big 24

### Mute-Sensor

to suppress sound output during electrocautery

**Unit 1**

Art.-  
No.

**510 025** 4.0 m

### Replacement tube nipples

for sound tubes and foam ear tips

**Unit 10**

Art.  
No.

**540 349**

### Replacement sound tubes

packed in pairs, red/blue

**Unit 2**

Art.  
No.

**540 348**

### Sterilisation box

synthetic, for stimulation instruments,  
Inner dimension 267 x 159 x 16 mm,  
delivered non-sterile, autoclavable

**Unit 1**

Art.  
No.

**522 900**

## 8 Application examples

The number of accessories refers to one application.

The application examples are based on the multimodal ISIS IOM system.

These are recommendations of inomed Medizintechnik GmbH. Deviations and changes are reserved for the user.

### 8.1

#### *Functional Mapping*

##### 8.1.1

#### *Speech Mapping*

Quantity per application	Unit	Art.-No.	Optional	Description	P.	inomed recommendation
1	10	522 624		Fork probe 45mm, straight, ball tip Single use only, ETO-sterilized	27	Direct cortical stimulation
2	10	533 646	X	SDN electrodes SET, 15/2000 mm Single use only, ETO-sterilized	6	EMG recording
1	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground for EMG Recording
1	1	611 014	X	Cortex-Strip electrode 4 contacts, 1 Strip with cable Single use only, ETO-sterilized	13	EEG
1	10	533 629		SDN electrode WH 15/1000 Single use only, ETO-sterilized	5	EEG Reference
1	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	EEG Ground

# 8 | Application examples

## 8.1.2 Motor-Mapping

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
1	10	525 650		Mapping Suction Probe by Raabe 120 mm, monopolar Single use only, ETO-sterilized	31	Direct cortical and subcortical stimulation
1	1	611 014		Cortex-Strip electrode 4 contacts, 1 Strip with cable Single use only, ETO-sterilized	13	Monitoring functional integrity of the corticospinal tract during mapping
2	10	533 646		SDN electrodes SET colorful, 15/2000 mm Single use only, ETO-sterilized	6	MEP recording for small muscles
2	10	533 666		SDN electrodes SET colorful, 20/2000 mm Single use only, ETO-sterilized	6	MEP recording for big muscles
1	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground
1	10	525 600	Alternative to 525 650	Stimulation probe 45mm, monopolar, angled 30°, Single use only, ETO-sterilized	29	Direct cortical and subcortical stimulation
1	1	611 014	X	Cortex-Strip electrode 4 contacts, 1 Strip with cable Single use only, ETO-sterilized	13	EEG
1	10	533 629		SDN electrode WH 15/1000 Single use only, ETO-sterilized	5	EEG Reference
1	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	EEG Ground
1	1	540 549	X	Grid/TES Stimulation Matrix only in combination with MEP stimulation adaptor 540 510, delivered non-sterile, non-autoclavable	51	Flexible interconnection of grid electrode contacts and TES MEP electrodes
1	1	540 510		MEP Stimulation adaptor for Grid/TES Stimulation matrix, 8 Channels high current stimulation, delivered non-sterile, non-autoclavable	51	For stimulation via Grid/Strip electrode usable

## 8.1.3 SEP Phase Reversal

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
1	1	611 014		Cortex-Strip electrode 4 contacts, 1 Strip with cable Single use only, ETO-sterilized	13	SEP recording
1	10	533 637		SDN electrodes RD/BK, 15/2000 Single use only, ETO-sterilized	5	Median nerve SEP stimulation
1	10	533 629		SDN electrode WH 15/1000 Single use only, ETO-sterilized	5	Reference
1	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground

## 8.2 Monitoring of Cranial Nerves

Caudal cranial nerves						
Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
1	10	522 606		BCS probe 130mm bayonet Single use only, ETO-sterilized	27	Direct nerve stimulation bipolar
1	10	525 603	Alternative to 522 606	Stimulation probe 45mm, monopolar, angled 30° Single use only, ETO-sterilized	29	Direct nerve stimulation monopolar
1	4	530 845		ALM Tube, I.D. 7.0 For the connection to the system, the cable 530 867 is necessary, Single use only, ETO-sterilized	18	N. Vagus / N. Recurrens
1	4	530 846	Alternative to 530845	ALM Tube, I.D. 7.5 For the connection to the system, the cable 530 867 is necessary, Single use only, ETO-sterilized	18	
1	4	530 847	Alternative to 530845	ALM Tube, I.D. 8.0 For the connection to the system, the cable 530 867 is necessary, Single use only, ETO-sterilized	18	
1	20	534 645		Double Needle Set colorful, 12/1500, 2.5mm Single use only, ETO-sterilized	8	Glossopharyngeal nerve
1	20	534 645		Double Needle Set colorful, 12/1500, 2.5mm Single use only, ETO-sterilized	8	Hypoglossal nerve
2	15	534 645		Double Needle Set colorful, 12/1500, 2.5mm for e.g. orbicularis oris and orbicularis oculi muscle Single use only, ETO-sterilized	8	Facial nerve
2	10	530 607		SDN electrodes RD/RD 20/1200, 90° for e.g. trapezius and masseter muscle Single use only, ETO-sterilized	11	Accessory nerve, Trigeminal nerve
1	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground

Further cranial nerves (additional to the caudal cranial nerves)						
Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
1	5	532 711		Oculomotor electrode, bipolar, 20/1500 mm Single use only, ETO-sterilized	11	Oculomotor nerve, Trochlear nerve, Abducens nerve
1	5	532 710	Alternative to 532 711	Oculomotor electrode, bipolar, 30/1500 mm Single use only, ETO-sterilized	11	
1	1	505 055		LED flash goggles for VEP stimulation Delivered non-sterile, autoclavable	55	Optic nerve

## 8 | Application examples

### 8.3 Interventions in cerebellopontine angle e.g. acoustic neuroma, vestibular schwannoma

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
1	10	522 606		BCS probe 130mm bayonet Single use only, ETO-sterilized	27	Direct nerve stimulation bipolar
3	60	530 751		Corkscrew electrode SET, Spiral-Needle 0.6 mm Single use only, ETO-sterilized	12	Median nerve SEP recording
2	10	533 637		SDN electrodes RD/BK, 15/2000 mm Single use only, ETO-sterilized	5	Median nerve SEP stimulation
2	20	534 645		Double Needle Set colorful, 12/1500, 2.5mm for e.g. orbicularis oris and orbicularis oculi muscle Single use only, ETO-sterilized	8	EMG recording for facial monitoring
2	10	530 607		SDN electrodes RD/RD 20/1200, 90° for e.g. trapezius and masseter muscle Single use only, ETO-sterilized	11	EMG recording for Trigeminal monitoring
1	10	533 626		SDN electrode RD, 15/1000 mm Single use only, ETO-sterilized	5	AEP recording right
1	10	533 621		SDN electrode BU, 15/1000 mm Single use only, ETO-sterilized	5	AEP recording left
2	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground
2	1	530 453	Alternative to 532 626 / 532 621	Tympanon electrode Single use only, ETO-sterilized	15	Optional, AEP recording
1	5	530 455	X	Ball electrode Single use only, ETO-sterilized	15	Optional, AEP recording directly at cochlear nerve
1	10	530 770	X	EP-Cap, helping tool for 10-20-System Single use only, delivered non-sterile	12	

### 8.4 Vascular neurosurgery e.g. Aneurysm, Cavernous hemangioma, etc.

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
6	60	530 751		Corkscrew electrode SET, Spiral-Needle 0.6 mm Single use only, ETO-sterilized	12	Median nerve SEP recording, MEP stimulation
6	10	533 646		SDN electrodes SET, 15/2000 mm Single use only, ETO-sterilized	6	EMG recording, MEP recording for small muscles
6	10	533 666		SDN electrodes SET, 20/2000 mm Single use only, ETO-sterilized	6	EMG recording, MEP recording for big muscles
2	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground
1	10	530 770	X	EP-Cap, helping tool for 10-20-System Single use only, delivered non-sterile	12	

## 8.5 Vascular surgery

e.g. Carotid endarterectomy

<https://shop.inomed.com>

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
3	60	530 751		Corkscrew electrode SET, Spiral-Needle 0.6mm Single use only, ETO-sterilized	12	Median nerve SEP recording
2	10	533 637		SDN electrodes SET, 15/2000 mm Single use only, ETO-sterilized	5	Median nerve SEP stimulation
1	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground
2	10	533 657	X	SDN electrodes RD/BK, 20/2000 mm Single use only, ETO-sterilized	5	Tibial nerve SEP stimulation
1	60	530 751	X	Corkscrew electrode SET, Spiral-Needle 0.6 mm Single use only, ETO-sterilized	12	Tibial nerve SEP recording
1	10	530 770	X	EP-Cap, helping tool for 10-20-System Single use only, delivered non-sterile	12	

## 8.6 ENT surgery

e.g. Parotidectomy

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
1	10	522 603		BCS probe 45mm angled 30°, 1.5 mm touchproof connector, single use, ETO sterilized	26	Direct nerve stimulation, bipolar
2	15	534 641		Double Needle Electrode, 2 channel set, 12/1500, 2.5mm inclusive SDN electrode green 15/1500 for e.g. orbicularis oris and orbicularis oculi muscle Single use only, ETO-sterilized	8	EMG recording for facial monitoring

## 8.7 Thyroid surgery

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
1	10	522 603		BCS probe 45mm angled 30°, 1.5 mm touchproof connector, single use, ETO sterilized	26	Direct nerve stimulation bipolar
1	4	530 845		ALM Tube, I.D. 7.0 For the connection to the system, the cable 530 867 is necessary, Single use only, ETO-sterilized	18	
1	4	530 846	Alternative to 530845	ALM Tube, I.D. 7.5 For the connection to the system, the cable 530 867 is necessary, Single use only, ETO-sterilized	18	
1	4	530 847	Alternative to 530845	ALM Tube, I.D. 8.0 For the connection to the system, the cable 530 867 is necessary, Single use only, ETO-sterilized	18	
1	10	525 603	Alternative to 522 603	Stimulation probe 45mm, monopolar, angled 30°, active tip 2mm, single use, ETO sterilized	29	Direct nerve stimulation monopolar

# 8 | Application examples

## 8.8 Spine surgery / Orthopedics

### 8.8.1 Intramedullary tumour

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
6	60	530 751		Corkscrew electrode SET, Spiral-Needle 0.6 mm Single use only, ETO-sterilized	12	SEP recording, MEP stimulation
2	10	533 637		SDN electrodes RD/BK, 15/2000 mm Single use only, ETO-sterilized	5	Median nerve SEP stimulation
2	10	533 657		SDN electrodes RD/BK, 20/2000 mm Single use only, ETO-sterilized	5	Tibial nerve SEP stimulation
2	10	533 646		SDN electrodes SET, 15/2000 mm Single use only, ETO-sterilized	6	EMG recording, MEP recording for small muscles
4	10	533 666		SDN electrodes SET, 20/2000 mm Single use only, ETO-sterilized	6	EMG recording, MEP recording for big muscles
1	5	530 684		FSRo2 Electrode, Flexible 2-pole recording and stimulation electrode Single use only, ETO-sterilized	15	D-wave
2	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground
1	10	530 770	X	EP-Cap, helping tool for 10-20-System Single use only, delivered non-sterile	12	

### 8.8.2 Spinal deformities

e.g. Scoliosis / Kyphosis

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
6	60	530 751		Corkscrew electrode SET, Spiral-Needle 0.6 mm Single use only, ETO-sterilized	12	SEP recording, MEP stimulation
2	10	533 637		SDN electrodes RD/BK, 15/2000 mm Single use only, ETO-sterilized	5	Median nerve SEP stimulation
2	10	533 657		SDN electrodes RD/BK, 20/2000 mm Single use only, ETO-sterilized	5	Tibial nerve SEP stimulation
2	10	533 646		SDN electrodes SET, 15/2000 mm Single use only, ETO-sterilized	6	EMG recording, MEP recording for small muscles
4	10	533 666		SDN electrodes SET, 20/2000 mm Single use only, ETO-sterilized	6	EMG recording, MEP recording for big muscles
2	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground
1	10	530 770	X	EP-Cap, helping tool for 10-20-System Single use only, delivered non-sterile	12	

### 8.8.3 Pedicle screw stimulation (Using ISIS IOM system)

Quantity per application	Unit	Art. No.	Optional	Description	P.	inomed recommendation
1	10	525 616		Stimulation probe 85 mm, monopolar, straight, ball tip Single use only, ETO-sterilized	30	Pedicle stimulation
8	10	533 666		SDN electrodes SET, 20/2000 mm Single use only, ETO-sterilized	6	EMG recording
1	10	533 651		SDN electrode GN 20/1500 mm Single use only, ETO-sterilized	5	Ground
1	10	525 615	Alternative to 525 616	Stimulation probe 85 mm, monopolar, bayonet, ball tip Single use only, ETO-sterilized	30	Pedicle screw stimulation
1	1	522 130	X	Bipolar Pedicle Stimulation Probe For connection to the system the adaptor cable 520 078 and the stimulation cable 520 024 or 520 027 are necessary.	37	Pedicle stimulation for minimal invasive procedure (=MIS)

### Using C2 NerveMonitor for pedicle screw stimulation with posterior approach

	Art. No.	Needle length	Cable length	Description	Piece	Colour
	535 640	20 mm	2-4 m	Spine Surgery Set for EMG Recording, posterior approach, Colour-coded needle electrode set, 9 electrode pairs and 1 ground electrode, Single use only, ETO-sterilized	1	
	540 730		5 m	EMG Adaptor for color-coded accessories for maximal 8 color-coded differential recording channels, delivered non-sterile, non-autoclavable	1	

All electrodes and adaptor boxes can be used with both ISIS IOM system and C2 NerveMonitor.
